Teams: a competency-based approach provides a solid coverage of the underlying theory of teamwork complemented by examples to help students learn and practice the competencies that will allow them to take advantage of team building opportunities. This book helps readers to systematically identify, analyze, and manage issues that arise as a result of teamwork by emphasizing four important objectives for successful team members: recognizing opportunities for accomplishing goals within a team context; appreciating other individuals' attributes in a group setting; analyzing the types of environments in which teamwork is most advantageous; identifying and building the necessary competencies to leverage successful group experiences. With exercises and activities designed to allow readers to engage with the material and build specific team-oriented competencies, this book offers undergraduate students interested in management, team building, and human resource training the tools needed for successful group experiences.

Leadership is inherent in every being despite one's job profile, but qualitative training and other traits are very important for the right behaviours. Every follower possesses attributes of a leader, but because these are somewhat concealed, to lead effectively becomes a huge challenge to many. This book is a result of many years of research; it focused on discovering those behavioural attributes that could combine effectively with the leader's competing roles to enhance his performance. A competing values framework (CVF) was applied to understand the leadership behaviours, characteristics, attributes, and roles that could influence a leader even in the face of contingency factors. The result was quite revealing: leaders that combine their roles with other attributes/skills achieve behavioural complexity, which are performance-enhancing behaviours. Furthermore, leaders are distinguished by their unique mental attitude, particularly in four roles they play: motivation, vision, analytic, and task master.
